

Visual Studio 2019 Community Edition with SSIS Support

1. Visual Studio 2019 Community Edition (Installer)

Official web installer:

https://aka.ms/vs/16/release/vs_community.exe

To create a full offline installer, run this command:

```
vs_community.exe --layout C:\VS2019_full --lang en-US
```

2. SQL Server Integration Services (SSIS) Extension for VS 2019

After installing Visual Studio 2019 Community Edition:

Step 1: Open Visual Studio

Step 2: Go to "Extensions -> Manage Extensions"

Step 3: Search for "SQL Server Integration Services Projects"

Or download it directly from the Visual Studio Marketplace.

Alternatively, Chocolatey has an installer (v4.6.0):

- SSIS Projects via Chocolatey: <https://community.chocolatey.org/packages/ssis-vs2019>

Installation Steps Summary

1. Download and run the Visual Studio 2019 Community installer.

2. Select the "Data storage and processing" workload.
3. Ensure "SQL Server Data Tools" is selected.
4. Complete the installation.
5. Install the SSIS extension via Extensions -> Manage Extensions.
